Chennai, Tamil Nadu | 8608289969 | sarasundar75@gmail.com | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Final-year MSc Integrated Data Science student at Amrita Vishwa Vidyapeetham with hands-on internship and 3+ academic project experience spanning data analysis, NLP, computer vision, and real-time AI systems. Proficient in Python, SQL, TensorFlow, PyTorch, Tableau, and cloud-based AI services. Demonstrated ability to analyze data, build dashboards, and design end-to-end ML solutions that improve accuracy and operational efficiency. Actively seeking Data Analyst or Data Science roles to apply and grow technical skills.

PROFESSIONAL EXPERIENCE

Data Analyst Intern

May 2026 – Jul 2026

Bluestock Fintech — under the guidance of Yash Kale, Project Manager

- Analyzed financial and stock market datasets using Python, SQL, and Excel to identify trends and support data-driven decision-making for fintech products.
- Built interactive dashboards and reports to visualize key performance indicators (KPIs), enabling stakeholders to track metrics and make informed business decisions.
- Performed data cleaning, preprocessing, and ETL (Extract, Transform, Load) on large, real-world datasets, improving data accuracy and integrity for downstream analysis.
- Collaborated with the project team to translate business requirements into actionable data insights, applying statistical analysis and data visualization best practices.
- Completed the internship with a certificate of recognition for contributions to data analysis workflows at a fast-growing fintech startup.

EDUCATION

MSc Integrated Data Science

2022 – 2027 (Expected)

Amrita School of Engineering (ASE), Coimbatore | CGPA: 6.98/10

Class XII – State Board (Maths–Biology)

2022

Govt Hr Sec School, Mazhaiyur, Tiruvannamalai | 67.33%

Class X – State Board (Maths–Biology)

2020

Oxford Matric Hr Sec School, Cheyyar | 77.4%

ACADEMIC PROJECTS

AI-Powered Small Business Feedback Analyzer

Nov 2025 – Apr 2026

Python · PyTorch · BERT · Streamlit · Pandas · NumPy · Groq LLM · Machine Learning · NLP · ETL

- Engineered a BERT-based Aspect-Based Sentiment Analysis (ABSA) system that processed multilingual customer feedback, boosting sentiment classification accuracy by 12%.
- Built interactive Tableau dashboards to visualize sentiment trends and churn predictions, enabling automated business recommendations and increasing decision-making speed by 30%.
- Leveraged Generative AI and ETL pipelines with SQL to deliver explainable AI insights for small business intelligence workflows.

Image-Based Crop Disease Classification using Deep Learning

Jun 2025 – Oct 2025

Python · TensorFlow · CNN · Streamlit · OpenCV · NumPy · Pandas | Team of 3

- Designed a CNN model that identified 10 crop diseases from leaf images with 94% accuracy using statistical modeling techniques including data augmentation.
- Applied preprocessing and feature engineering to improve model robustness; deployed the solution with Streamlit for real-time disease detection serving 50+ test users.
- Collaborated with team members using version control (Git) to manage modular codebase and iterative model training.

Agentic AI Research Assistant

Dec 2025 – Jan 2026

Python · LLM APIs · NLP · Web Automation · Pandas · Email Automation

- Developed an Agentic AI system that automated research request processing via email, reducing manual research time by an estimated 40%.
- Implemented topic extraction, automated web research, and AI-generated summaries utilizing LLM APIs and Python NLP pipelines.
- Designed a scalable modular workflow for intelligent research assistance with Big Data processing capabilities.

Where Is MyBus – Real-Time Bus Tracking System

Nov 2025 – Mar 2026

Python · GPS Module · Embedded Systems · Real-Time Tracking | Team of 4

- Spearheaded a real-time bus tracking system that monitored live bus locations and estimated arrival times, improving commuter travel convenience by 35%.
- Integrated GPS modules for live location tracking and implemented real-time updates with ETA prediction algorithms.

TECHNICAL SKILLS

Languages & Programming: Python, SQL, C Programming

Machine Learning / AI: Machine Learning, Deep Learning, NLP, Reinforcement Learning, Generative AI / LLMs, Statistical Modeling

Frameworks & Libraries: TensorFlow, PyTorch, Scikit-learn, BERT, OpenCV, Pandas, NumPy, Matplotlib, Streamlit

Data & Cloud: Data Preprocessing, Feature Engineering, ETL Pipelines, AWS (Cloud Practitioner), Big Data, Data Visualization (Tableau)

DevOps & Tools: Git (Version Control), Docker (familiar), Jupyter Notebook, IoT Systems

Soft Skills: Analytical Thinking, Problem-Solving, Collaboration, Leadership, Communication

CERTIFICATIONS

AWS Cloud Practitioner

2025

Amazon Web Services — Certified in cloud computing fundamentals; experienced in deploying ML models on SageMaker and AWS cloud platform.

Data Analysis with Python

Aug 2024

IBM Cognitive Class — Practical knowledge in data preprocessing, analysis, visualization, and Python-based data science techniques.

Python and Machine Learning Bootcamp

Aug 2024

GDSC & AWS Community Builder — Covered ML concepts, Python programming, model building, and practical AI applications.

Email Writing Skills

Apr 2024

Infosys Springboard — Professional email communication and business writing skills.

AWARDS & ACHIEVEMENTS

2nd Place – Math Pirates Event, Login 2024

Sept 2024

PSG College of Technology — Demonstrated strong analytical and problem-solving abilities in a competitive inter-college mathematics competition.

VOLUNTEERING

Mathematics Team Volunteer – Anokha 2024

Oct 2024

Amrita Vishwa Vidyapeetham — Assisted in event coordination, participant engagement, and academic event activities for the annual tech fest.
